

# Roller gates

Combination of functionality and aesthetics

## EVERYDAY COMFORT

Roller gates can be equipped with a radio SELVE controller and remote control or with LED lighting and photocells. Thanks to this solution, the gates can be controlled with a single remote control, which makes it possible to operate them without leaving your car. The Somfy Keytis is a four-channel remote control informs you, among other things, about the closing of the gate through a two-colour LED light. Additionally, it has an individually set code protecting against burglary. For added security, you can equip the door with an NT key switch, mounted on the outside of the door.

## INDIVIDUAL DESIGN

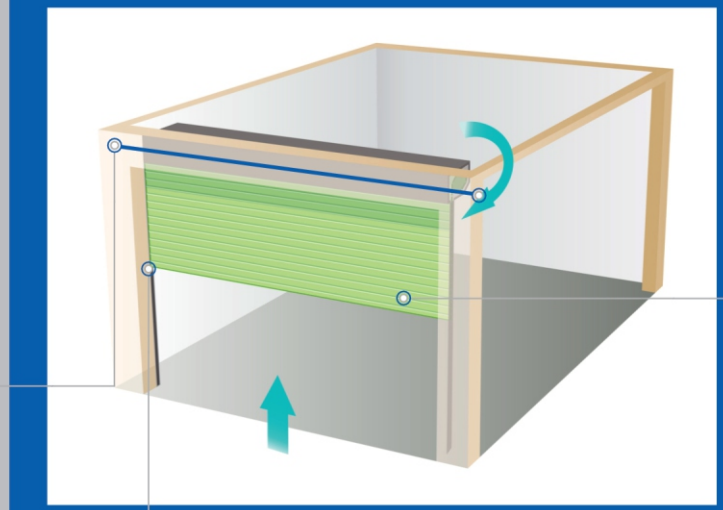

Our wide offer allows us to customise the dimensions of the gates to the needs of our customers. We can offer manufacture of gates up to 6m wide, with wind resistance class 2. In addition, we offer a range of high quality mechanisms that ensure safety and functionality when using the gates.

## SAFETY

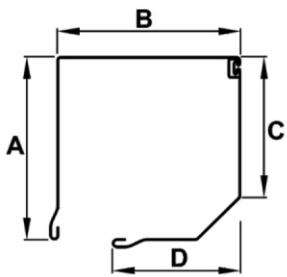

The gate is additionally equipped with an inertial brake which supports the weight of the armoring in case of sudden closing of the gate. The gate may also be equipped with special photocells, which thanks to the sensors are able to detect a person, an animal or a vehicle, which stops the automatic operation. This solution ensures safety especially in a situation when there are children around. ALUKON gates are also a perfect protection against burglary, thanks to the blocking hangers that protect the armoring from the outside.

## DURABILITY

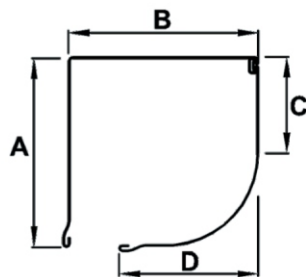

The door profiles are made of double-walled aluminium, filled with foam, which works as an additional thermal insulation barrier. Horizontal embossing of the armoring increases its strength and ensures a longer service life. In addition, the doors meet the latest European Union safety requirements (TUV certification and building standard approval).

## TYPES OF ROLLER DOOR BOXES AND MOUNTING OPTIONS

Box 45°  
**CLASSIC**

Quarter round box  
**OVAL**

The cassette can be installed in a built recess both inside and outside the garage.
