

# Salamander VIP

Window brand affordable for everyone

## SALAMANDER BRAND

The recognised brand name of the product emphasises the high quality of the material used. The main chambers of the window are equipped with wide steel reinforcements, which significantly improve the stability of the structure. A wide colour palette means that everyone will find a colour to suit their taste. Salamander VIP system is characterized by a unique white shade, which gives the window an elegant appearance. The Classic type window is equipped with a straight sash as standard.

## SAFETY

The window has been in production for many years and, despite the passage of time, it is still willingly bought due to the benefits it brings to its users every day. Thanks to profiles with improved depth of construction and the use of modern fittings with anti-theft "mushroom pins", which increase the level of security, we can enjoy a peaceful night's sleep.

## THERMAL PROPERTIES

The window with a 5-chamber system with a frame width of 73mm achieves a very good thermal insulation value for the entire window, which even with a standard glazing package does not exceed  $U_w = 1,2 \text{ W/m}^2\text{K}$ . The construction allows for the use of wide glazing packages, even up to 44 mm wide, which significantly improves the insulation parameters of the window.

## GOOD VALUE FOR MONEY

You will not regret buying Salamander VIP windows. The highest quality at the best price, available for everyone.
