

External Venetian Blind Systems for Facades

Enjoy the sunshine at any time

External Venetian blind C-80

MODERN DESIGN

Unlike standard solutions available on the market, the most important feature of the Venetian blinds is the possibility of covering large areas. The C-80 lamellas are ideal for both single and multi-family dwellings. Rich colours and slim design perfectly fit into modern construction trends. The blinds can be manufactured in any RAL colour.

STABLE AND COMPACT

Aluminium lamellas C-80 are characterised by high stability - it is possible to make blinds up to 6m long with a surface area of up to 24 m². Whereas lamella C-80 flexi, thanks to its slim construction, allows for compact construction of larger heights.

WIDE RANGE OF INSTALLATION POSSIBILITIES

The construction of the venetian blinds makes it possible to install them under-plaster or on the plaster. Various types of cover sheets, runners and brackets make it possible to adjust them to any on-site requirements.

DIMENSIONS AND CONSTRUCTION C-80 | C-80 flexi

		C-80	C-80 Flexi
Blind width	min.	600 mm	600 mm
	max.	6000 mm*	4000 mm*
Blind height	min.	500 mm	500 mm
	max.	4000 mm	4000 mm
Package height	min.	130 mm	125 mm
	max.	360 mm	320 mm
Surface of the blinds	max.	24 m ²	16 m ²

COMFORT OF USE

Blinds are an ideal solution for people who wish to control the light streams in a room. Their construction allows to adjust the angle of lamellas depending on the degree and intensity of sunlight. Thanks to this, we can enjoy the sun not only regardless of the day, season or weather, but also protect ourselves from the surrounding light and nature. In addition, the construction of the Z-90 lamellas makes it possible to close the blinds to practically completely black out the room.

DURABILITY

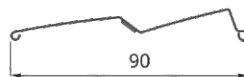

Z-90 lamellas are characterised by greater resistance to windy conditions. In addition, they have a large installation range.

AVAILABILITY

The ability to remotely control and create your own scenarios makes it extremely convenient to use. Using Somfy IO motors, it is now possible to control from anywhere in the world using a smartphone. The wind and sun sensors are an extra addition to simplify the operation.

DIMENSIONS AND CONSTRUCTION OF Z-90

Z-90

Z-90

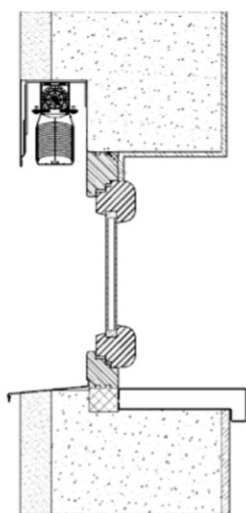

Blind width	min.	600 mm
	max.	6000 mm*
Blind height	min.	500 mm
	max.	4000 mm
Package height	min.	145 mm
	max.	345 mm
Surface of the blinds	max.	24 m ²

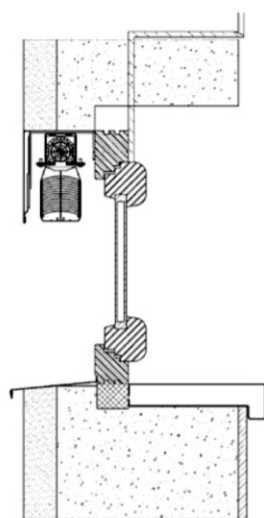

*As the width of the blind increases, its resistance to wind decreases.

Control your blinds in a smart and convenient way from anywhere in the world with Somfy io.
